# the Valuber Security advantage
comprehensive technology & manpower solutions

Valuber Security delivers innovative integrated surveillance and security system solutions incorporating best-in-breed technologies to improve organizations' overall situational awareness and responsiveness with advanced capabilities like predictive analysis to address impending events and potential threats.

We accomplish this by offering turnkey system solutions and managed manpower services that combine to deliver truly integrated security solutions. The process begins with a comprehensive threat assessment and analysis of your security program and system requirements, and carries through system design and engineering, installation, implementation, training and maintenance, and manpower services if and when required. This ensures every Valuber Security customer receives the best security solution that they need to establish and sustain the highest levels of surveillance and security today and tomorrow.

That's the Valuber Security Integration advantage!

VALUBER
SECURITY

integration from A to Z

When we say that we integrate systems, we're talking true integration, where otherwise disparate system technologies are configured on a single management platform to deliver the highest benchmarks in performance and efficiency. Valuber Security can design and implement the specific surveillance and security applications you need to best protect your facility, campus and remote locations.

Our technology prowess includes:

- Surveillance and Access Control Systems
- Analytics
- Visitor Management
- Employee Badging

- Intercom and Communication Systems
- Infant Abduction and Senior Elopement Detection
- Parking and Revenue Control Solutions
- And more

What's more, our integrated solutions can be supplemented to include the best combination of manpower and technology. With managed services ranging from system maintenance to investigations and compliance consultation and badging services, Valuber Security delivers truly comprehensive integrated security solutions.

That's the Valuber Security integration advantage.

---

specialized managed (manpower) services
